If you know someone who is ready to buy or sell real estate, please contact me with their name and number, I would be glad to provide them with top-quality service!

Subdivision Gem!

This David Weekley plan features a smooth-flowing floor plan that lends itself to comfortable living and easy going entertaining. This particular homeowner chose dramatic upgrades that bring this home to a much higher level.

Plantation shutters add an elegant touch throughout the home. The lighted art niches provide striking venues for artistic treasures. French doors have been added to the great room as well as the master bedroom, bringing in sunlight and accessing the gorgeous wraparound deck.

The master suite features a romantic fireplace, an added mirror, and lots of usable wall space. The sitting area in the bedroom suite has an office/sitting area with enough room for exercise equipment! Check your email, relax with a book, or work out -- all in the same space!

Double glass block windows in the master bath soften the natural light streaming in over the dramatic tub. The walk-in closet is large enough for seasonal wardrobes.

Corian countertops in the gourmet kitchen add to the upscale feel of this home. Extra glass shelving and lighting create a dramatic accent. The island and breakfast bar make the kitchen a gathering spot that opens into the tiled great room. Wired for sound, the great room has a built-in space for a big screen television and stereo equipment. The large mirror above the gas fireplace adds to the spaciousness of the living space.

Outdoor amenities include the covered wood deck with ceiling fans -- outdoor speakers -- a stone sidewalk -- sprinkler system -- manicured landscaping -- and wood privacy fence.

This elegant home is perfect inside and out. Contact your Realtor for a showing, or call Marcy at 413-5842 to schedule a showing. You won't want to miss out on this showcase home in Georgetown Village!
